## ◆ PURPOSES OF EDUCATION

- Cultivate an understanding of humanity
- Help to acquire knowledge, expertise and build the character to be an industrial engineer
- Promote health and improve physical strength

## ◆ Our Image of the Ideal School

- Master craftsmanship and its spirit
- Development of human resources with advanced skills to support communities

## ◆ HISTORY of NIITSU TECHNICAL HIGH SCHOOL

Our school was founded in 1963 backed by strong demand from the local people. It developed as a comprehensive technical high school with Mechanical engineering course, Electrical engineering course and Electronics course.

As course reorganization was pushed forward since 2009, it made a fresh start as a technical high school with distinctive features that aim towards high manufacturing and the acquisition of practical skills. The four courses we have now are : Engineering master course, Industrial engineering course, Robotics engineering course and Japanese architecture course.

## ◆ Four Courses

- Engineering master course
- Industrial engineering course
- Robotics engineering course
- Japanese architecture course

## ◆ School Events · Student Council Activities

- |          |   |
|----------|---|
| June     | Sports Day                                  |
